

YUNEFY

Master Your Inventory With Confidence

Strategies for fast-growing e-commerce businesses to streamline
inventory management

Transforming Inventory Management Challenges

Fast-growing e-commerce businesses often **struggle with chaotic inventory processes**, leading to stock discrepancies and lost sales. Yunefy offers a solution, **streamlining operations** and providing clarity to enhance efficiency and profitability.

Real-Time Inventory Visibility

Stay updated with live data and sync

Real-time updates ensure that your inventory levels are always accurate. **Cloud sync** allows for seamless data sharing across devices, while **barcode scanners** streamline the tracking process, minimizing errors and enhancing efficiency in your operations.

Multi-Warehouse and Bin-Level Tracking

Achieve precise inventory control across locations

With **granular tracking** capabilities, Yunefy allows businesses to manage inventory across multiple warehouses efficiently. Our system provides **real-time updates** on stock levels, enabling staff to easily locate items and ensure optimal stock levels in every bin.

Cycle Counting

Stay ahead with proactive inventory management techniques

Cycle counting ensures accurate records by regularly checking stock quantities, allowing for better planning and decision-making to help maintain optimal inventory levels.

Easy Inventory Tracking

Comprehensive tracking

Inventory life-cycle tracking - manages stock stages (e.g. aging, obsolete). **In-transit inventory tracking** - tracks goods in-transit between facilities/vendors. Syncs inventory data from **vendor inventory feeds** for actual availability.

SKU-Level Reporting Insights

Unlock detailed analytics to boost inventory efficiency and decision-making.

Comprehensive Data Analysis

Access in-depth reports that help identify trends and patterns.

Historical Performance Tracking

Review past sales to optimize future inventory planning effectively.

Actionable Insights

Leverage insights to enhance operations and drive business growth.
